

SAMUEL BEKOE

Computer Science Graduate | Technology & Digital Solutions

Location: Adentan, Greater Accra, Ghana **Phone:** 0595412232 **Email:** einsteinjunir3002@gmail.com

GitHub: github.com/einsteinjunir3002-cyber

PROFESSIONAL SUMMARY

Motivated and practically grounded Computer Science graduate from the University of Cape Coast (UCC, Class of 2026) with comprehensive skills in computer troubleshooting, hardware & software management, digital research, web development, and AI-assisted engineering (prompt engineering & rapid prototyping). Adept at diagnosing technical issues, managing operating systems, researching solutions, and building database-driven web platforms. Combines foundational computer science knowledge with strong hands-on problem-solving abilities and a fast, self-directed learning approach. Prepared to add immediate value in National Service Scheme (NSS) placements, IT support, digital operations, and technology development teams.

CORE SKILLS & COMPETENCIES

Computer Support & IT Management

Computer Troubleshooting, Hardware Diagnostics, Operating System Setup (Windows/Linux), Software Installation & Maintenance, Peripheral Configuration, Network Setup Basics.

AI-Assisted Development & Engineering

Prompt Engineering, AI-Assisted Code Generation, Vibe Coding, AI-Driven Debugging & Component Refactoring, Rapid Prototyping, Technical Solution Research.

Web & Application Development

HTML5, CSS3, JavaScript (ES6+), React, Next.js, Node.js, Express, SQLite, PostgreSQL (Prisma ORM), REST API Integration, Responsive Design.

Productivity & Professional Strengths

Fast & Accurate Typing, Technical Documentation, Independent Learning, Git & GitHub Version Control, Adaptability, Detail-Oriented Execution.

FEATURED TECHNICAL PROJECTS

SmartLearn — AI-Powered Collaborative Learning Platform

UCC Final-Year Capstone Project

2025 – 2026

Tech Stack: React, Vite, Node.js, Express, SQLite (better-sqlite3), JWT, Context API, Vanilla CSS

- Co-engineered a full-stack learning management platform designed to elevate university student collaboration and independent study efficiency.
- Integrated an interactive **AI Study Assistant** capable of answering curriculum questions in context and providing immediate academic assistance.
- Developed features including collaborative peer study workspaces, subject-based digital resource library, topic-based quizzes with automated feedback, and direct in-app messaging.
- Structured backend services with JWT authentication, custom business logic layers, and pre-seeded SQLite relational database schema.
- Repository: github.com/einsteinjunir3002-cyber/L400-PROJECT-SUBMISSION

LIKEM Perfumes — Ghanaian Social-Commerce & E-Commerce Platform

Client Web Solution

2026

Tech Stack: Next.js (App Router), TypeScript, Prisma ORM, PostgreSQL, Paystack Ghana, WhatsApp API

- Architected and launched a production-grade e-commerce web platform for an independent Ghanaian fragrance vendor to expand social media sales.
- Implemented a dual-channel ordering system: instant 1-click WhatsApp order dispatch with pre-filled cart details and server-verified Paystack checkout (supporting MTN MoMo, Telecel Cash, and Cards).
- Engineered regional shipping calculations across Ghana and built an administrative portal with inventory tracking and WhatsApp sale recording.
- Repository: github.com/einsteinjunir3002-cyber/Likem-Store

Bekoe Rental Property Website & Tenancy Management System

Enterprise Web Solution

2026

Tech Stack: Next.js 14+ (App Router), TypeScript, Prisma ORM, Tailwind CSS, Lucide Icons, SQLite/PostgreSQL

- Designed and developed a database-driven property website for a residential rental business in Adenta New Site, Greater Accra.
- Built an intuitive public portal allowing prospective tenants to browse verified room vacancies, filter by rental terms, and schedule physical viewings.
- Integrated direct WhatsApp enquiry messaging and created a role-based administrative dashboard for room status management, publishing controls, and tenancy records.

ARSPCS — Autonomous Robotic Solar Panel Cleaning Simulation

Systems Engineering

2026

Tech Stack: Python 3, State Machine Architecture, Matplotlib, Physics Simulation Models, Automated Testing

- Engineered a telemetry and state-machine simulation for autonomous solar panel cleaning robots operating in tropical dusty conditions.
- Simulated battery degradation, environmental soiling index, operational state transitions, and generated client executive performance reports.
- Repository: github.com/einsteinjunir3002-cyber/joy-solar-robot-simulator

EDUCATION & ACADEMIC BACKGROUND

University of Cape Coast (UCC)

2022 – 2026

Bachelor of Science (BSc) in Computer Science

Completed 4-year accredited degree. Key modules: Data Structures & Algorithms, Database Systems, Software Engineering, Computer Networks, Operating Systems, Web Technologies. Final Year Project: AI-Integrated LMS (SmartLearn).

Pentecost University

Accra, Ghana

Business Information Technology — NCC Programme

Coursework in business information systems, computer fundamentals, and digital business applications.

Valley View University

Accra, Ghana

Diploma in Computer Science Studies

Foundational training in programming concepts, computer architecture, and computational problem solving.

Ideal College

Accra, Ghana

WASSCE Preparation & Academic Advancement

Focused preparation to strengthen academic standing, leading to successful admission into the BSc Computer Science programme at UCC.

West Africa Senior High School (WASHS)

2017 – 2020

West African Senior School Certificate Examination (WASSCE)

Completed senior high school education in Adentan, Greater Accra. Completed WASSCE in 2020.

Dieudonné International School

Completed 2017

Basic Education Certificate Examination (BECE)

PERSONAL PARTICULARS & AVAILABILITY

Nationality: Ghanaian • **Current Location:** Adentan, Greater Accra, Ghana • **Languages:** English (Fluent), Twi, Ewe • **Availability:** National Service Scheme (NSS), IT Support, Junior Tech & Web Roles.
